*% Daily Value not established.

Who is this for?

- Individuals looking to lose weight/body fat and can tolerate stimulants, including caffeine. This product's ingredients will enhance thermogenesis (burning calories) and help to control appetite. This can help increase total calorie burn and contribute to the caloric deficit required for fat loss.

What makes this product unique?

- Thermogenic complex with caffeine, yerba mate,* guarana,* green tea extract polyphenol (EGCG) and capsaicin that have independently, combined and additively demonstrated total daily energy expenditure (TDEE) enhancements and fat oxidation increases compared to placebo
- Sinetrol (polyphenols), which is a combination of non-stimulant polyphenols that also contributes, but through different mechanisms, to increases in fat oxidation - i.e. supporting energy usage from body fat
- Contains Caralluma fimbriata, a plant-based appetite support ingredient

How should I take this?

- Take 2 tablets up to 2 times daily, approximately 30 minutes before breakfast or lunch. Do not take within 5 hours of bedtime or mix with other stimulants.
